EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

The application has been amended as follows:

In the Title:

After "Decoder", --Selectively Using Frame/Field Processing-- has been inserted.

2. The following is an examiner's statement of reasons for allowance: Claim 1 is considered allowable over the prior art because none of the references of record alone or in combination suggest, disclose, or teach an image signal decoder comprising a VLD; a frame/field processing detection-section; an IQ; an IDCT; a MC; a frame buffer; a field interpolation section for, when the frame/field processing detection-section determines that the input image signal is coded in units of fields, interpolating one of field data from the MC and generating a second output image signal; and an output switching section all together as claimed. The closest prior art, Kurobe et al (EP 0 935 396 A2), discloses conventional image signal decoding, either singularly or in combination, fails to anticipate or render the above limitations obvious.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Y. Lee whose telephone number is (571) 272-7334. The examiner can normally be reached on (571) 272-7334.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, James Groody can be reached on (571) 272-7950. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
